

Next Steps

Email list of folks attending meeting/invited will be maintained to continue discussion.

Interim steering committee will look to meeting input for guidance and will also look to guidance from National Fish Habitat Action Plan board.

Need to have someone following through- need a coordinator full time or near full time.

USFWS and NOAA will fund a full time person (NOAA supported this workshop with funding; USFWS with facilitation and webinar arrangements)

PSMFC will post presentations and information from workshop on their website and will maintain the website for the group in the interim.

First meeting of Interim Steering Committee should be soon so momentum isn't lost.
