

HOW TO LIVE WITH BEAVERS

PROTECT YOUR TREES OR GARDEN

ABRASIVE PAINTING

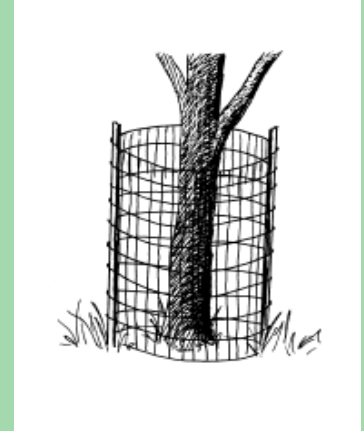

Materials:

Exterior latex with color to match bark
Mason Sand 30 mil - 70 mil

Mix 5 oz sand per quart of paint
Mix in small batches, or press sand on by hand after painting.

CAGE TREES OR FENCE GARDENS

CULVERT PROTECTION

Create Structure Above Culvert for Beavers to Start New Dam

NO PERMIT NEEDED: if use no motorized equipment; fewer than 100 stakes

Materials:

4' high, 3"-5" untreated posts or live willow stakes

About 30' above culvert, drive posts into the streambed every 18-24" continuing up onto the streambank. Create slight curve in the middle facing downstream. Put wood removed from clogged culvert upstream of posts for beavers to start dam on.

SOLUTIONS BELOW REQUIRE MAY REQUIRE FISH PASSAGE PERMITS, CONTACT ODFW

CULVERT PROTECTION

BEAVER DECEIVER :
Trapezoidal Fencing
in front of culvert –
Skip Lisle

**DOUBLE FILTER SYSTEM or
PIPE & FENCE**

CONTROLLING POND LEVEL

CASTOR MASTER: Double
Walled Pipe & Round
Fence Filter - Skip Lisle

FLEXIBLE LEVELER:
Single walled pipe
& domed filter –
