FY19 Accomplishments

- Engage Partners to Enhance Conservation and Recovery Actions
- Complete and Advance Priority ESA Consultations
- Species in the Spotlight
- Sustain and Increase Fishing Opportunities

Columbia Basin Partnership

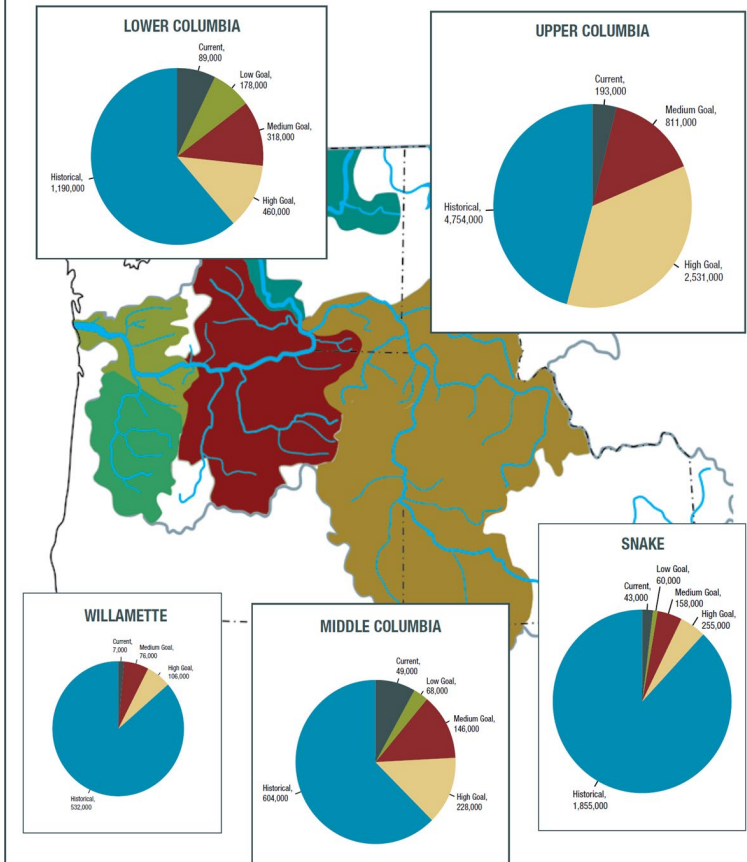

FIGURE 16. Natural production goals for spawning escapement relative to current and historical values. Current, low goal, medium goal and high goal pie slices are incremental relative to lower values (e.g., low goal total = current + additional increment needed to reach the total identified for the low goal).

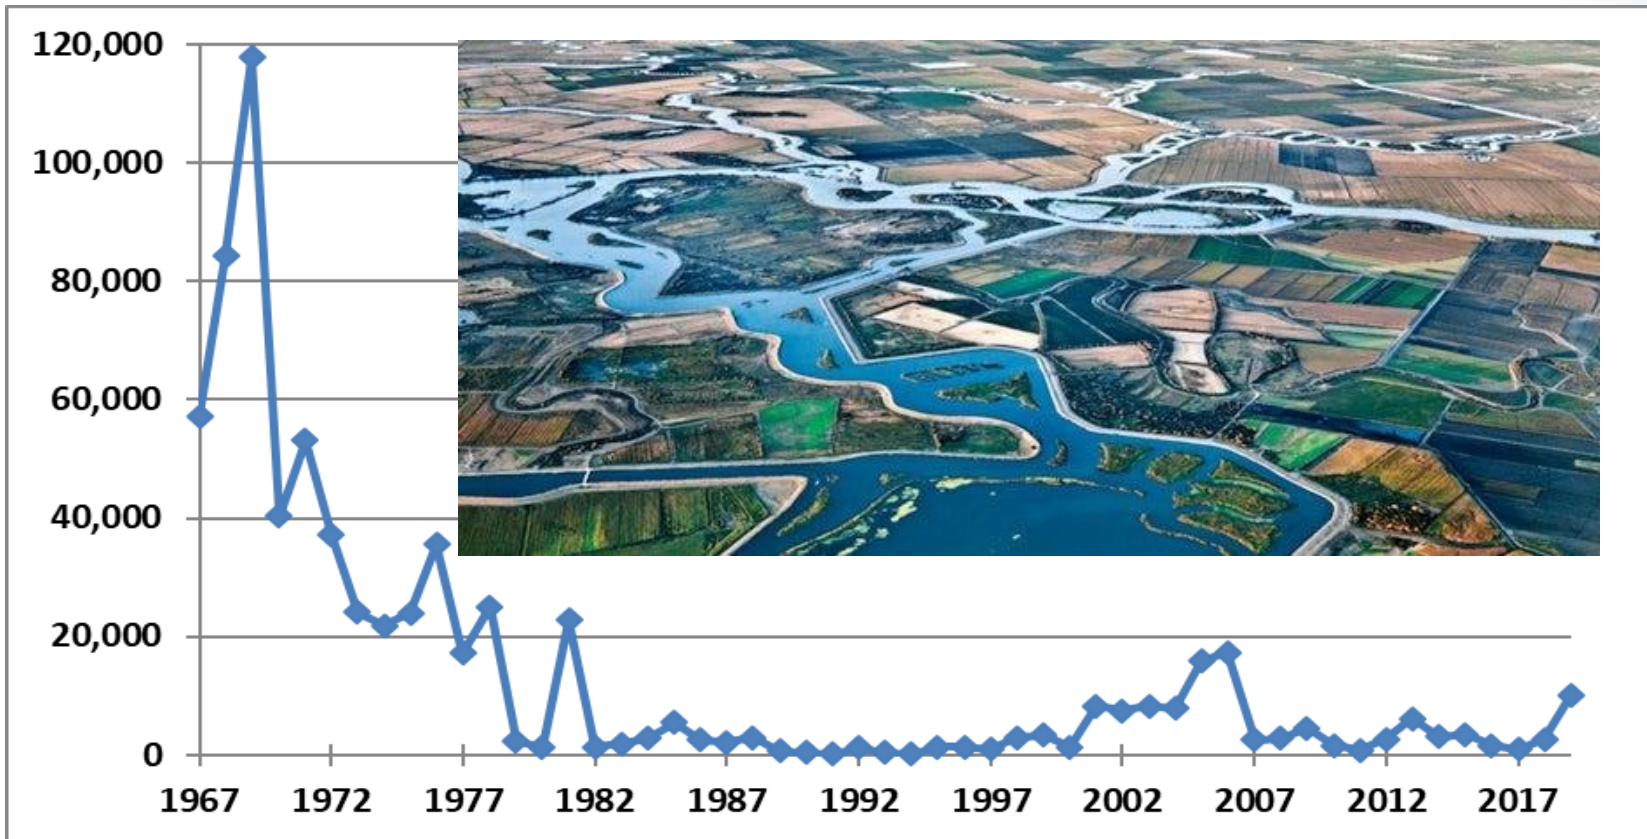

2019 Columbia River System Operations Biological Opinion

Central Valley Project Long Term Operations Biological Opinion

Chinook Winter-run Adult returns

Overwater structures - docks

Species in the Spotlight - Southern Resident Killer Whales

TOP 10 PRIORITY CHINOOK POPULATIONS FOR SOUTHERN RESIDENTS

1. Northern and southern Puget Sound (fall)
2. Lower Columbia River (fall), Strait of Georgia (fall)
3. Upper Columbia River and Snake River (fall), Fraser River (spring), and lower Columbia (spring)
4. Mid-Columbia River (fall)
5. Snake River (spring-summer), Northern Puget Sound (spring)
6. Washington Coast (spring and fall)
7. California Central Valley (fall)
8. Mid-Columbia River and upper Columbia River (Spring and summer)
9. Fraser River (summer)
10. California Central Valley (fall/late fall), Klamath River (fall and spring)
