

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

DATES: Written comments must be submitted on or before April 25, 2017.

ADDRESSES: Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at pracomments@doc.gov).

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to Ashley Chappell, NOAA Integrated Ocean and Coastal Mapping Coordinator, 1315 East West Hwy SSMC3 Rm 6813, Silver Spring, MD 20910, 240-429-0293, or ashley.chappell@noaa.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

The National Oceanic and Atmospheric Administration (NOAA) Office of Coast Survey and the U.S. Geological Survey (USGS) National Geospatial Program plan to conduct a follow-on study to the National Enhanced Elevation Assessment (NEEA) white paper finalized in 2012 (NEEA overview can be found at <https://pubs.usgs.gov/fs/2012/3088/>). This NEEA follow-on study will incorporate coastal and ocean requirements for elevation data along with a revisit of the terrestrial elevation data needs assessed via a similar survey in 2010 (OMB Control No. 1028-0099). The primary tool to gather information will be a questionnaire covering a wide range of business uses that depend on 3D data to inform policy, regulation, scientific research, and management decisions. For purposes of this questionnaire, 3D data refers to topographic data (precise three-dimensional measurements of the terrestrial terrain) and bathymetric data (three-dimensional surface of the underwater terrain). Questions will be asked about how 3D data relate to other data types such as the shoreline; characteristics of tides, currents, and waves; and the physical and chemical properties of the water itself. A series of questions will be asked as they relate to specific Mission Critical Activities. These will include questions about the area (geographic extent), 3D data accuracy requirements, linkages to other

data to support a wide range of analysis, and benefits of having the required data.

NOAA, USGS and partner mapping agencies are working to improve the technology systems, data, and services that provide information about 3D data and related applications within the United States. By learning more about business uses and associated benefits that would be realized from improved 3D data, the agencies will be able to prioritize and direct investments that will best serve user needs. This questionnaire is part of an effort to develop and refine future program alternatives that would provide enhanced 3D data to meet many Federal, State, and other national business needs.

Because 3D data are collected and used to meet a wide range of mission critical needs, we are seeking input from managers and data users from a variety of government entities (e.g., Federal, State, local, Tribal) as well as not for profit, academic, and private/commercial entities. The findings are expected to establish a baseline of national business needs and associated benefits for 3D data and associated technologies. This baseline will enhance the responsiveness of NOAA, USGS, and partner agency programs to stakeholder needs, and inform the design of directed future programs that balance requirements, benefits, and costs at a national scale. Collected responses will be aggregated at the agency and national levels. Responses associated with individuals will not be distributed. The information collection process will be guided by an interagency management team led by NOAA and USGS with support from a professional services contractor. The information collection will be conducted using a standardized template. Responses are one-time and voluntary. In-person interviews to clarify questionnaire results may also be arranged. The draft questionnaire will be posted for the duration of this public comment period at the NOAA Integrated Ocean and Coastal Mapping site (<https://iocm.noaa.gov/>).

II. Method of Collection

Emails will be sent to a comprehensive list of stakeholders, with requests to forward to any other interested participants. The emails will include a link to the online survey, which can also be provided upon request by paper or other means. In-person interviews may follow to resolve questions, clarify answers and add more detail to responses.

III. Data

OMB Control Number: 0648-xxxx.

Form Number(s): None.

Type of Review: Regular (request for a new information collection).

Affected Public: Federal government, State, local or tribal governments; not-for-profit institutions, academia, business or other for-profit organizations.

Estimated Number of Respondents: 600.

Estimated Time per Response: 2 hours.

Estimated Total Annual Burden Hours: 1,200.

Estimated Total Annual Cost to Public: \$0 in recordkeeping/reporting activities.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: February 16, 2017.

Sarah Brabson,

NOAA PRA Clearance Officer.

Fishing Capacity Reduction Program for the Pacific Coast Groundfish Fishery

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of sub-loan repayment.

SUMMARY: NMFS issues this notice to inform interested parties that the

Washington coastal Dungeness crab sub-loan in the Pacific Coast Groundfish Capacity Reduction (Buyback) Program has been repaid. Therefore, Buyback fee collections on Washington coastal Dungeness crab sub-loan will cease for all landings after January 31, 2017.

DATES: Comments must be submitted on or before 5 p.m. EST March 13, 2017.

ADDRESSES: Send comments about this notice to Paul Marx, Chief, Financial Services Division, NMFS, Attn: Washington coastal Dungeness crab Buyback, 1315 East-West Highway, Silver Spring, MD 20910 (see **FOR FURTHER INFORMATION CONTACT**).

FOR FURTHER INFORMATION CONTACT: Michael A. Sturtevant at (301) 427-8782 or *Michael.A.Sturtevant@noaa.gov*.

SUPPLEMENTARY INFORMATION: On November 16, 2004, NMFS published a proposed rule in the **Federal Register** (69 FR 67100) proposing to implement an industry fee system for repaying the Washington coastal Dungeness crab Buyback sub-loan. The final rule was published July 13, 2005 (70 FR 40225) and fee collection began on September 8, 2005. Interested persons should review these for further program details.

The Washington coastal Dungeness crab Buyback sub-loan in the amount of \$369,425.93 will be repaid in full upon receipt of buyback fees on landings through January 31, 2017. NMFS has received \$620,742.30 to repay the principal and interest on this sub-loan since fee collection began September 8, 2005. Based on Buyback fees received to date, landings after January 31, 2017, will not be subject to the Buyback fee. Therefore, Buyback fees will no longer be collected in the Washington coastal Dungeness crab fishery on future landings.

Buyback fees not yet forwarded to NMFS for Washington coastal Dungeness crab landings through January 31, 2017, should be forwarded to NMFS immediately. Any overpayment of Buyback fees submitted to NMFS will be refunded on a pro-rata basis to the fish buyers based upon best available fish ticket landings data. The fish buyers should return excess Buyback fees collected to the harvesters, including Buyback fees collected but not yet remitted to NMFS for landings after January 31, 2017. Any discrepancies in fees owed and fees paid must be resolved immediately. After the sub-loan is closed, no further adjustments to fees paid and fees received can be made.

Dated: February 17, 2017.

Brian T. Pawlak,

CFO/Director, Office of Management and Budget, National Marine Fisheries Service.

RIN 0648-XF241

New England Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The New England Fishery Management Council (Council) is scheduling a public workshop of its Habitat Committee to consider actions affecting New England fisheries in the exclusive economic zone (EEZ). Recommendations from this group will be brought to the full Council for formal consideration and action, if appropriate.

DATES: This meeting will be held on Monday, March 13, 2017, Tuesday, March 14, 2017 and Wednesday, March 15, 2017 at 9:30 a.m. each day.

ADDRESSES: The meeting will be held at the Fairfield Inn & Suites, 185 MacArthur Drive, New Bedford, MA 02740 on Monday, March 13 and Tuesday, March 14, 2017 and at the Sheraton Harborside, 250 Market Street, Portsmouth, NH 03801 on Wednesday, March 15, 2017.

Council address: New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950.

FOR FURTHER INFORMATION CONTACT: Thomas A. Nies, Executive Director, New England Fishery Management Council; telephone: (978) 465-0492.

SUPPLEMENTARY INFORMATION:

Agenda

The Council is developing management areas to protect deep-sea or cold water corals found offshore New England from impacts due to fishing gear interactions. Concentrations of corals occur in the canyons, continental slope, and seamounts south of Georges Bank, and also in deep waters of the Gulf of Maine, including some inshore sites (Mt. Desert Rock and Outer Schoodic Ridge) as well as in Jordan and Georges Basins offshore. Some coral habitats appear to be actively fished, while others appear to be beyond the

current footprint of bottom-tending gear operations.

In developing these coral management areas, the Council is seeking to minimize their impacts on existing fisheries. Designing these areas to accommodate fishing activity requires a detailed understanding of where different gears are used in relation to the potential coral management areas. Therefore, the Council is seeking guidance from active fishermen who use bottom-tending gears (trawls, traps, and other gear types) offshore in the Gulf of Maine and in the slope and canyon region south of Georges Bank. Other stakeholders interested in coral management are also welcome to attend the workshops and provide their input. Specifically, the Council is seeking: (1) Industry information on fishing activities within proposed coral protection zones; and (2) suggestions about how to refine management area boundaries to limit impacts to fishing operations while still providing protection for corals.

Three days of discussion in two locations are scheduled:

- In New Bedford (March 13 and 14) the workshop will focus on fishing activity in and around the draft deep-sea coral zones south of Georges Bank (canyons and continental slope). These zones are generally deeper than 150 fathoms. Note that large pelagic fishermen who work in the canyon/slope region are *not* proposed to be impacted by the Coral Amendment. The discussion is intended to carry over between the two days, so participants are encouraged to attend on both Monday and Tuesday if possible.

- In Portsmouth (March 15) the workshop will focus on fishing activity in Jordan Basin and the Lindenkohl Knoll area of Georges Basin. Proposals for the inshore areas around Outer Schoodic Ridge and Mount Desert Rock are *not* the intended focus of this Portsmouth gathering.

The purpose of these workshops is to refine the boundaries of the Council's existing proposals. Public hearings will be conducted later this spring to solicit comments, including general support of or opposition to, all areas proposed in the amendment.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during these meetings. Action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has
