**WASHINGTON COASTAL DUNGENESS CRAB INDUSTRY NOTICE**

**Season Opening Delayed In Washington, Oregon and  
California (North of Point Arena)**

On Tuesday November 14, 2018 coastal Dungeness crab Tri-State policy representatives from the Washington Department of Fish and Wildlife (WDFW), the Oregon Department of Fish and Wildlife (ODFW) and the California Department of Fish and Wildlife (CDFW) agreed to delay the opening of the 2018-19 Coastal Dungeness crab fishery from Point Area, California north to the US/Canada border through December 15<sup>th</sup> at least. This decision was based on crab condition tests conducted by WDFW, ODFW and CDFW which shows that all test areas do not currently meet the minimum meat recovery criteria.

The Tri-State Dungeness Crab Pre-Season Testing Protocols specify that after the first round of testing, if any area does not meet the minimum meat recovery criteria (23% north of Cascade Head and 25% south of Cascade Head) a delay is required and additional testing is required before a season opening date can be confirmed.

A second round of both meat recovery and domoic acid testing is scheduled to be conducted after Thanksgiving. WDFW will provide additional information regarding the season opening as soon as possible following the completion of the upcoming tests.

Coast-wide test meat recovery results to date are found in the attached table.

Note that Domoic acid tests from crab collected in each Washington test area are not yet available. Those results will be posted in the next few days at:
