

Use of E-reporting and E-creels for Managing Anadromous Fisheries in Idaho

Chris Sullivan

2025 Pacific Coast Steelhead Management Meeting

Presentation Outline

- Background
- Electronic Permit Implementation
- Electronic Creel Implementation
- Challenges
- Looking to the Future

Background – Idaho Anadromous Fisheries

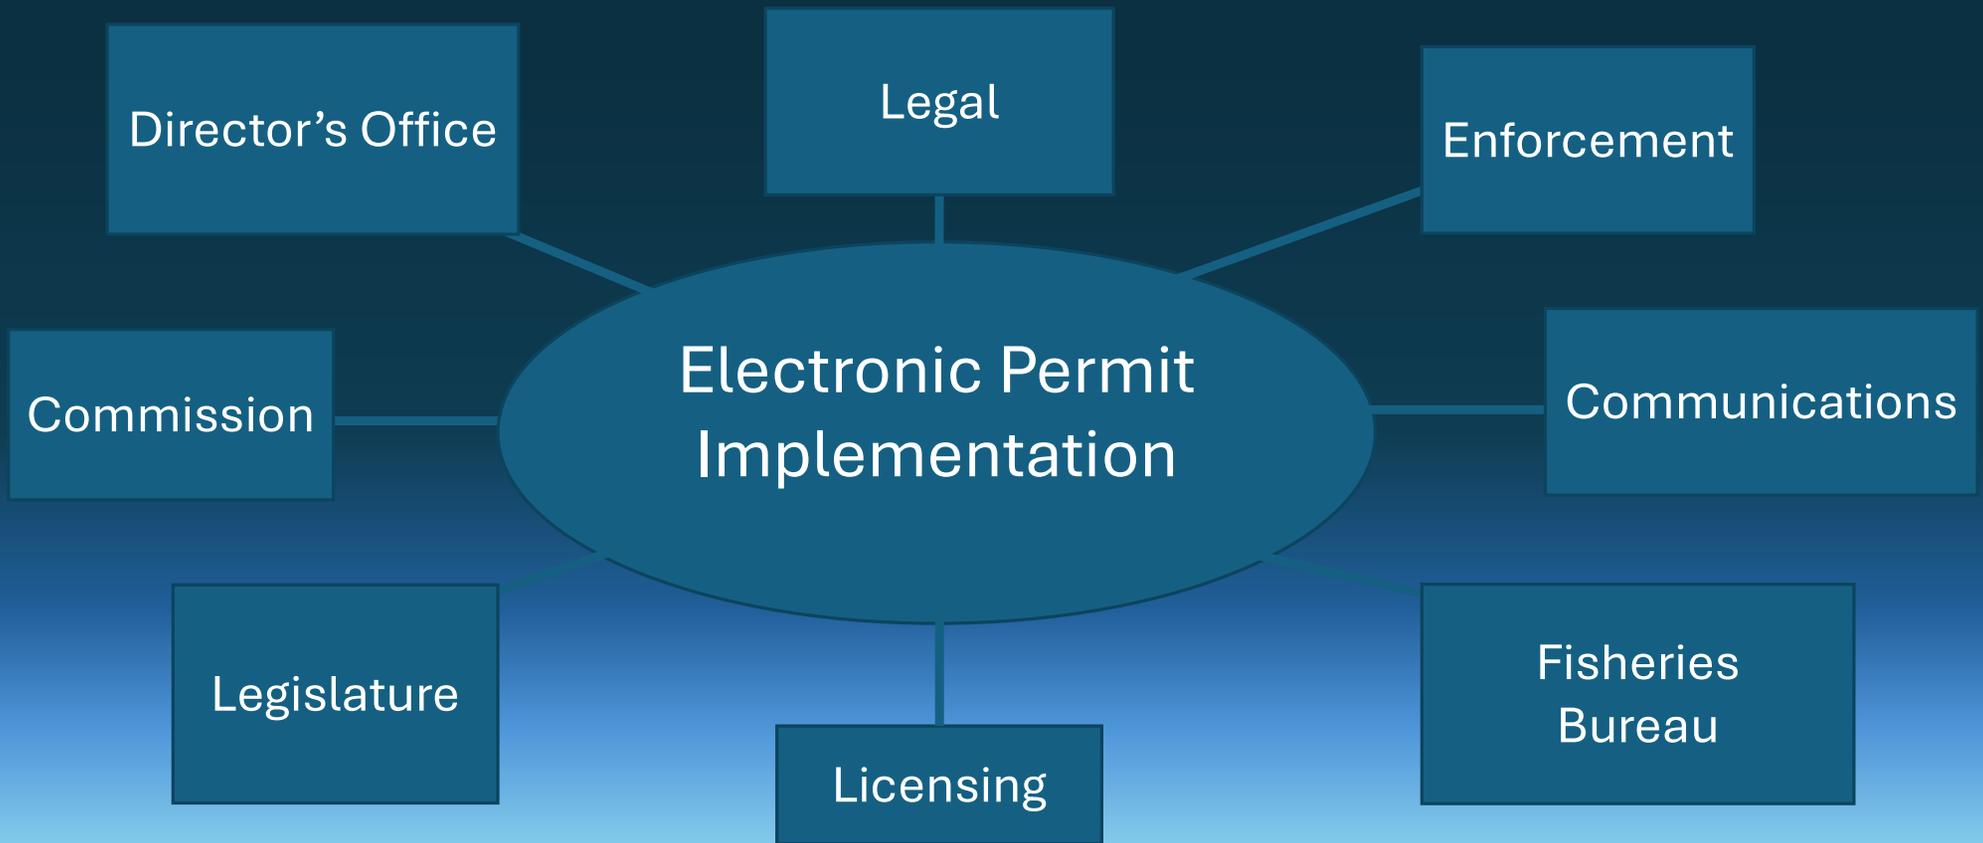

- Steelhead and Salmon fisheries operate on over 550 miles of river
- Steelhead fisheries open July – May
- Chinook fisheries open April – October
- Coho fisheries open September – December
- Traditional creel surveys = lots of time and money

Implementation – electronic permits (E-tagging)

- 2020-2021 – IDFG began discussions to implement e-tagging
- Spring 2023 – IDFG Electronic Permit Workgroup Formed

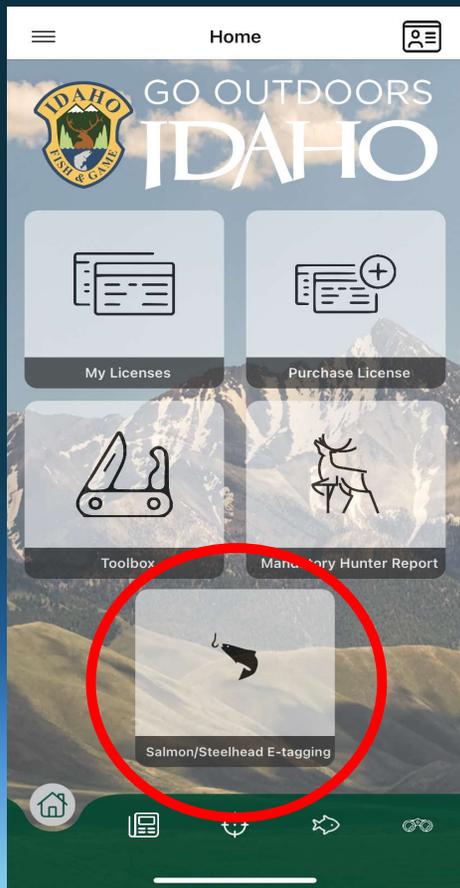

Implementation – electronic permits (E-tagging)

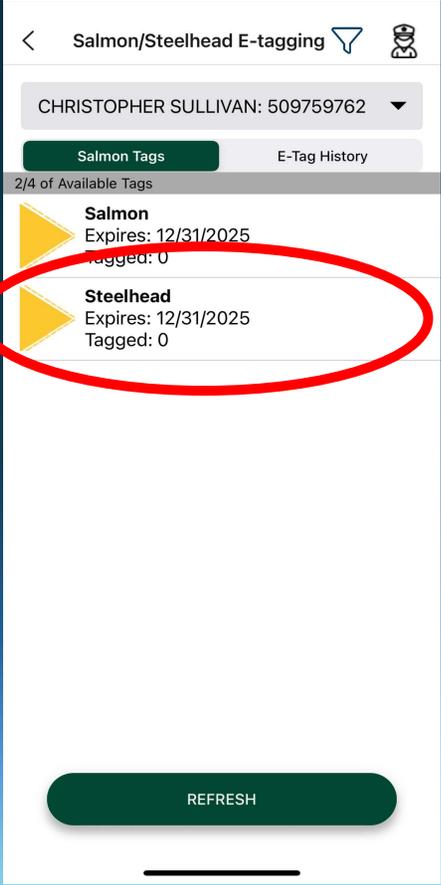

Implementation – electronic permits (E-tagging)

- April 1, 2024 - Electronic salmon and steelhead permits available
- GO OUTDOORS IDAHO app to validate permit on smartphone
- E-tagging implemented for several reasons:
 - Angler convenience
 - Fishery management benefits
 - monitoring efficiencies
 - harvest estimation accuracy

Electronic Salmon Permit

Choose Chinook or Coho →

Choose Clip Status →

The screenshot shows a mobile application interface for "Harvest Reporting". At the top, there is a back arrow and the title "Harvest Reporting". Below this is a section titled "Harvest Salmon" with a subtitle "If user holds a RES or NONRES Salmon Permit". A dropdown menu shows the user's name and ID: "CHRISTOPHER SULLIVAN: 509759762". Below this is a yellow arrow icon pointing right, followed by the text "Salmon" and "Expires: 12/31/2025". The form then contains several required fields, each with a dropdown menu: "River *" is set to "Salmon River"; "River Location *" is set to "10 - Salmon River, mouth to Upper Twi..."; "Species *" is set to "Chinook Salmon"; and "Adipose Fin Clipped *" has radio buttons for "Yes" and "No", with "No" selected. At the bottom of the form is a large green button labeled "SUBMIT".

Rules and Regs Changes – Paper Permits

Sample Salmon Permit

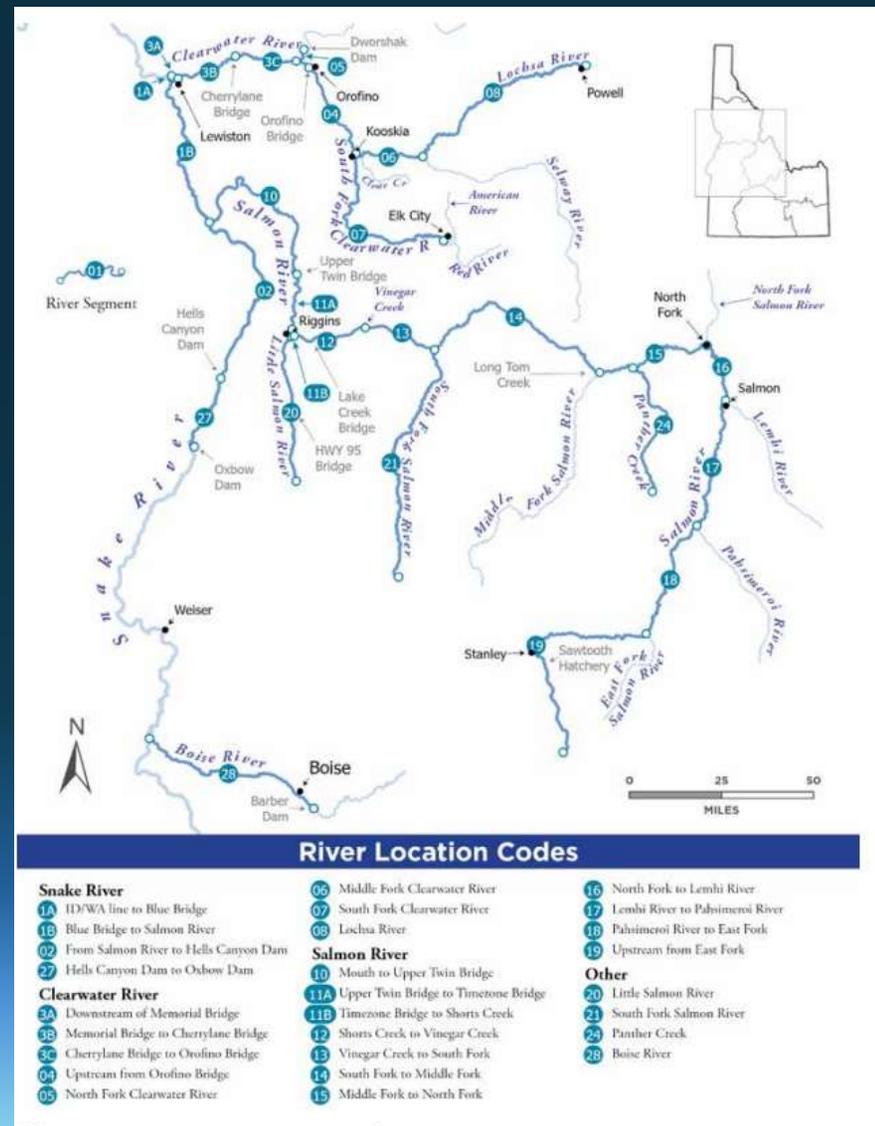

Fish	Month	River Location Code	Chinook	Coho	Adipose Fin Clipped?	
	Day				<input type="checkbox"/> Yes	<input type="checkbox"/> No
1			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/> Yes	<input type="checkbox"/> No
2			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/> Yes	<input type="checkbox"/> No
3			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/> Yes	<input type="checkbox"/> No

Sample Steelhead Permit

Fish	Month	Location Code	Month	Location Code	Fish
	Day		Day		
1					21
2					22
3					23

Rules and Regs Changes

- Change Administrative Code
- Anglers no longer required to notch permits when a fish is harvested
- Anglers required to indicate species and ad clip status for salmon permits
- Needed new river location codes to accommodate harvest estimation

Rules and Regs Changes

Snake River

- 1A ID/WA line to Blue Bridge
- 1B Blue Bridge to Salmon River
- 02 From Salmon River to Hells Canyon Dam
- 27 Hells Canyon Dam to Oxbow Dam

Clearwater River

- 3A Downstream of Memorial Bridge
- 3B Memorial Bridge to Cherrylane Bridge
- 3C Cherrylane Bridge to Orofino Bridge
- 04 Upstream from Orofino Bridge
- 05 North Fork Clearwater River

- 06 Middle Fork Clearwater River
- 07 South Fork Clearwater River
- 08 Lochsa River

Salmon River

- 10 Mouth to Upper Twin Bridge
- 11A Upper Twin Bridge to Timezone Bridge
- 11B Timezone Bridge to Shorts Creek
- 12 Shorts Creek to Vinegar Creek
- 13 Vinegar Creek to South Fork
- 14 South Fork to Middle Fork
- 15 Middle Fork to North Fork

- Needed new river location codes to accommodate harvest estimation

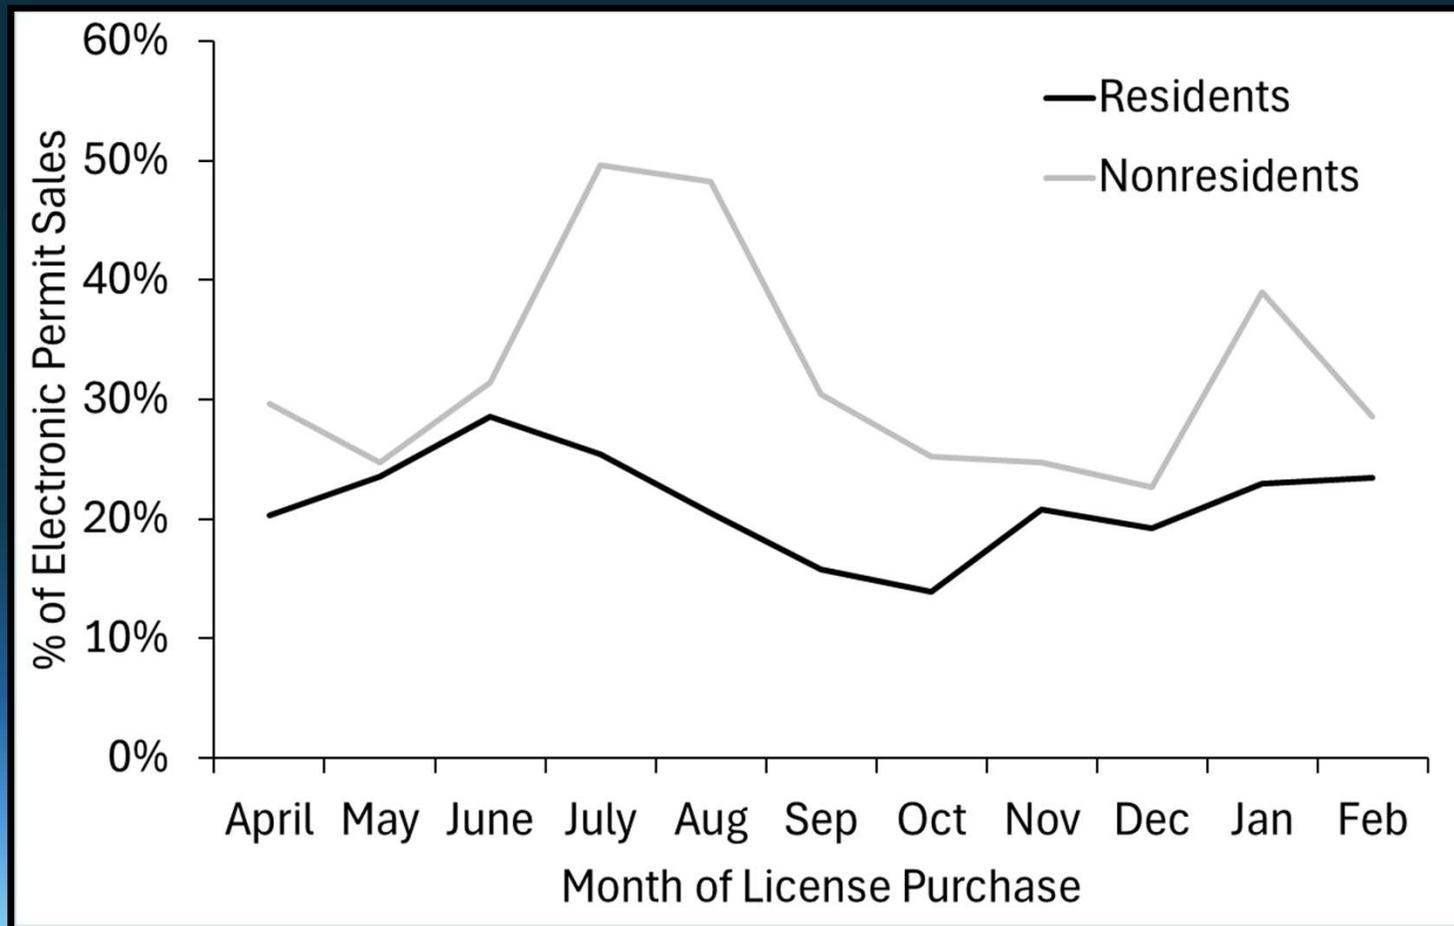

Implementation – electronic creel

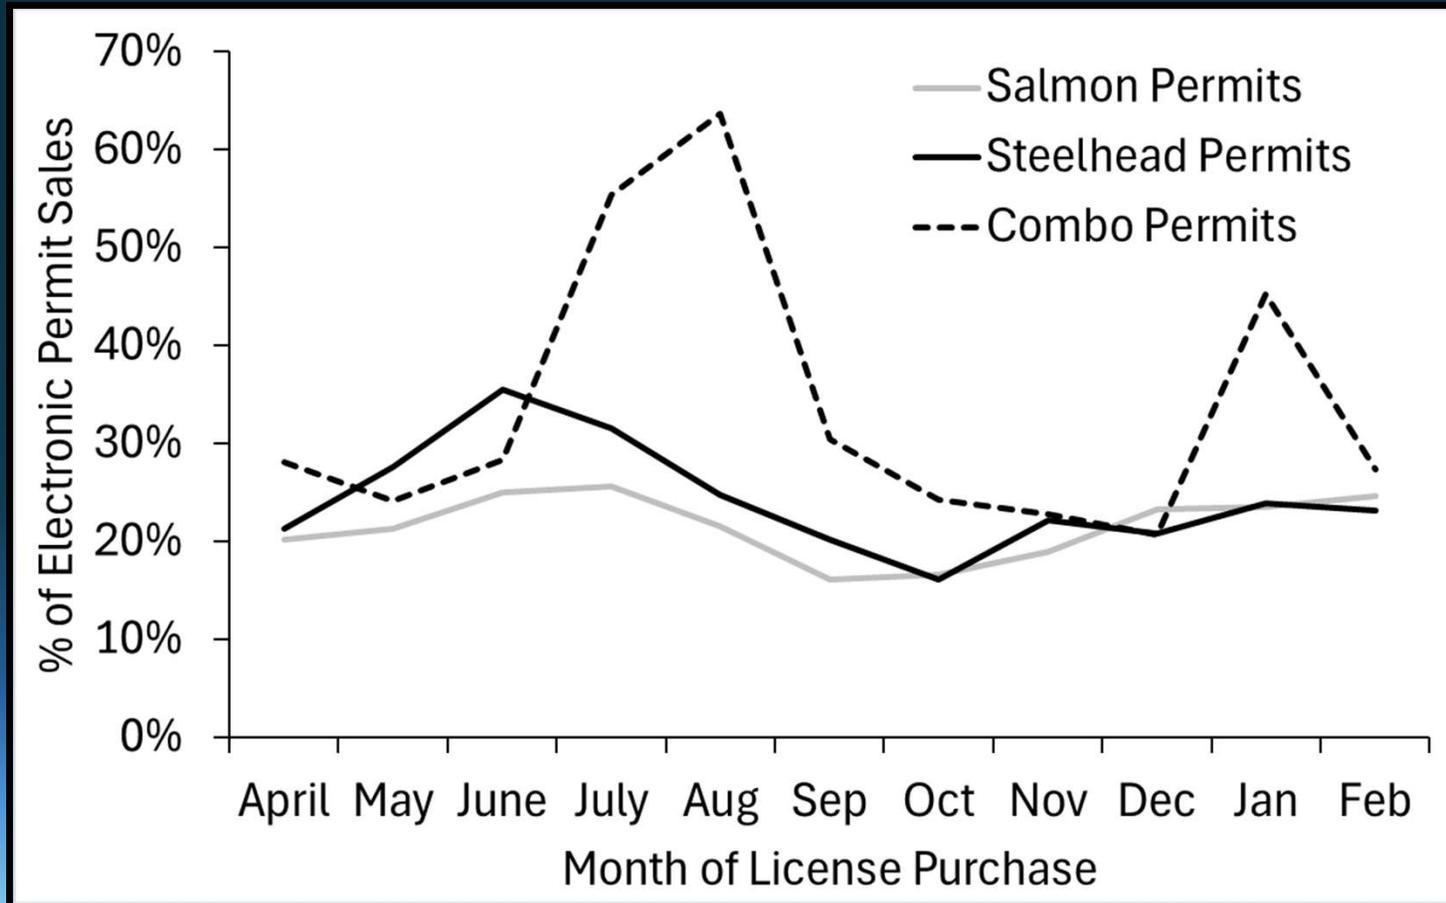

- Mark-recapture where e-tagged fish are “marked” and “recaptured” by creel clerks
- Tested during spring/summer Chinook fisheries in 2024
- Implemented for most Chinook fisheries for 2025 in-season management
- Used in spring 2025 steelhead fisheries
 - Replaced post-season phone/mail survey
- Use creel data to estimate effort, C&R of marked and unmarked fish

Permit Sales and Harvest Data

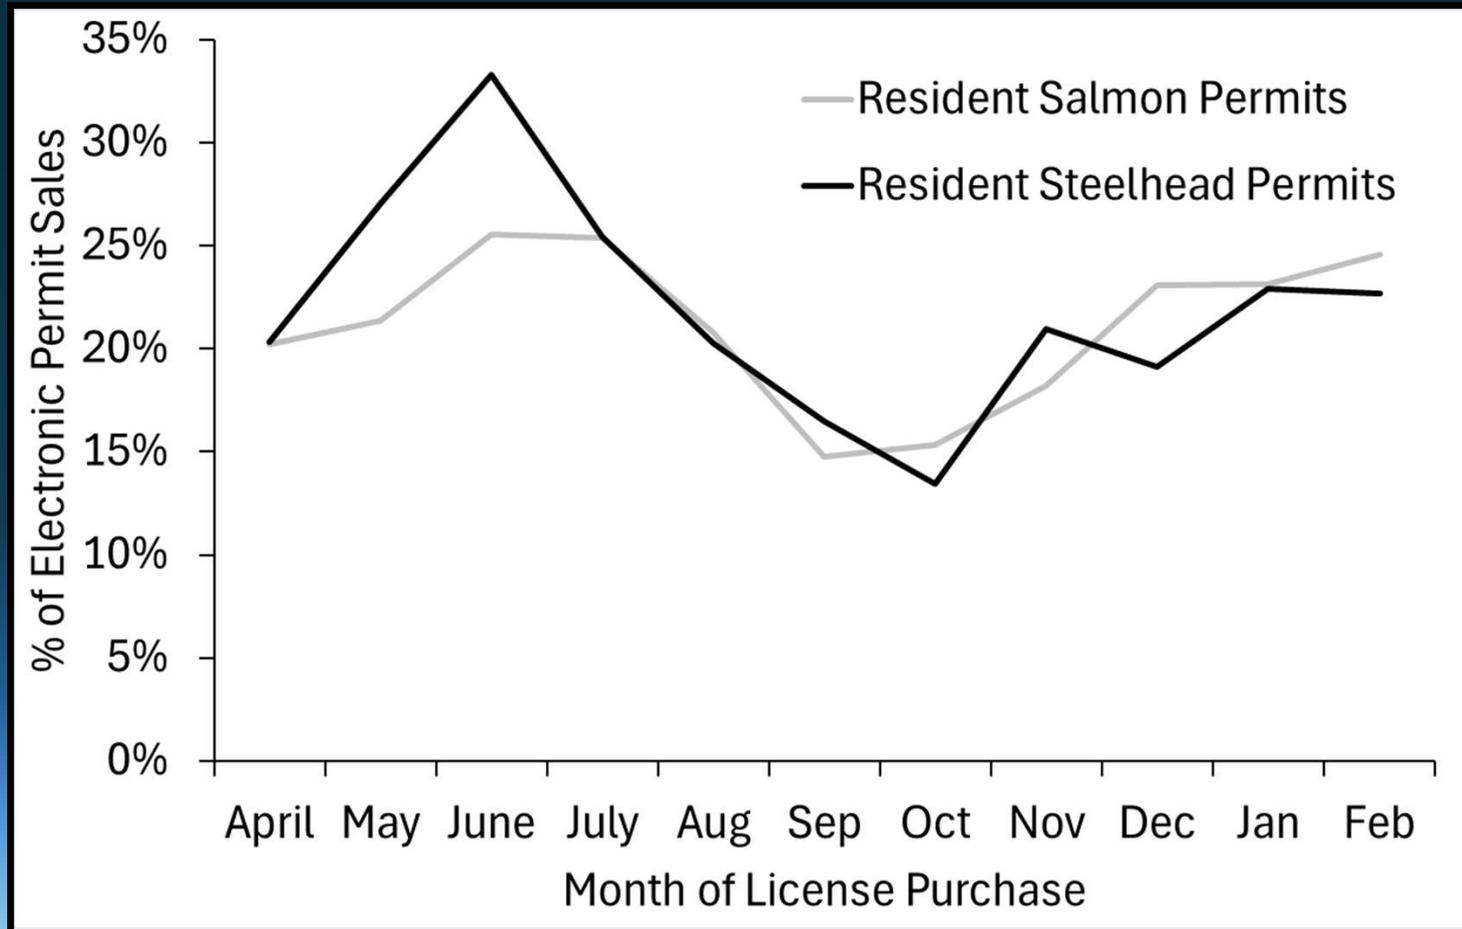

Permit sales stats – Residents vs Nonresidents

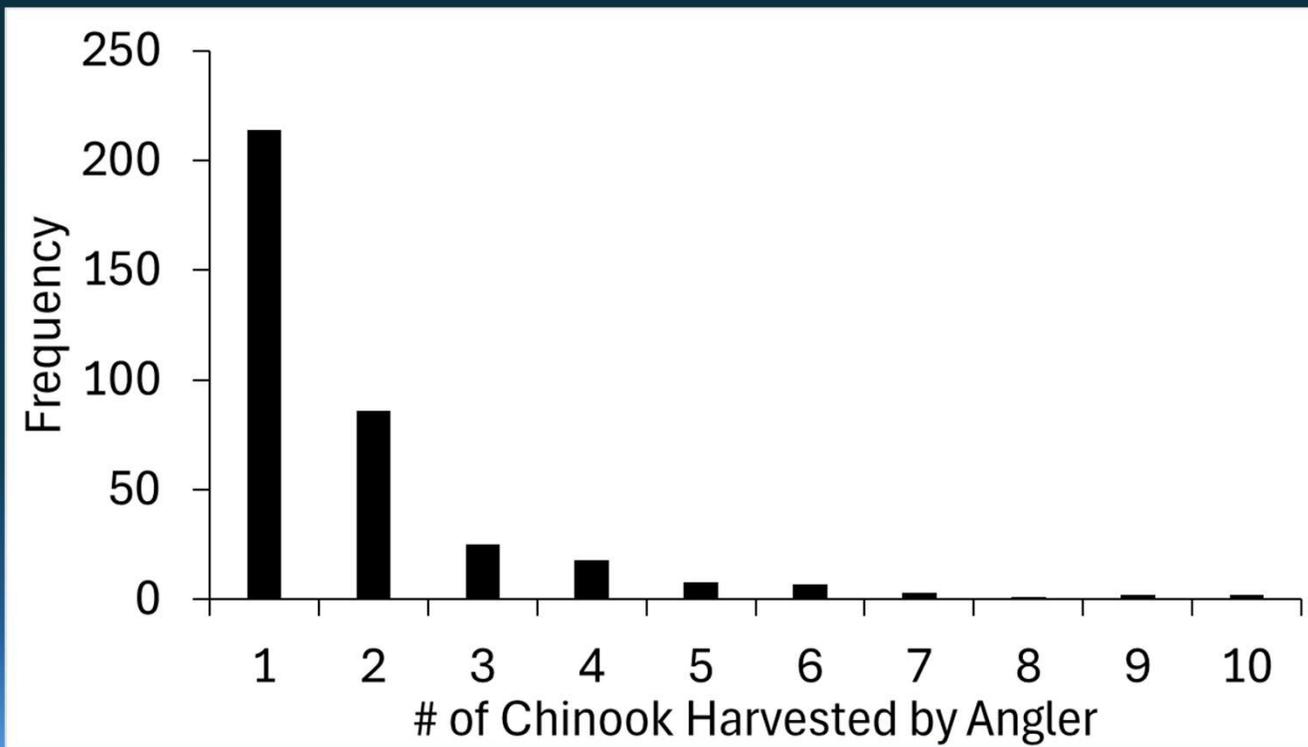

Permit sales stats by species

Permit sales stats for residents by species

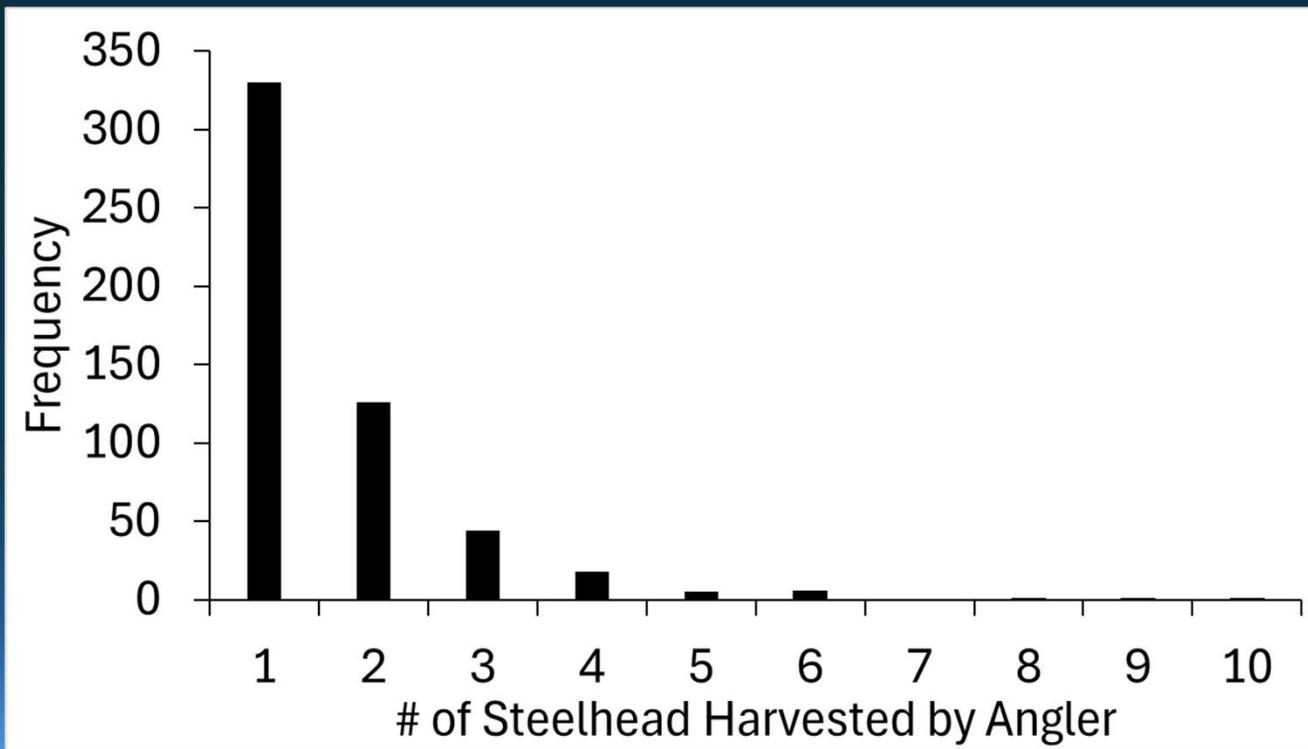

Number of fish harvested per angler - Chinook

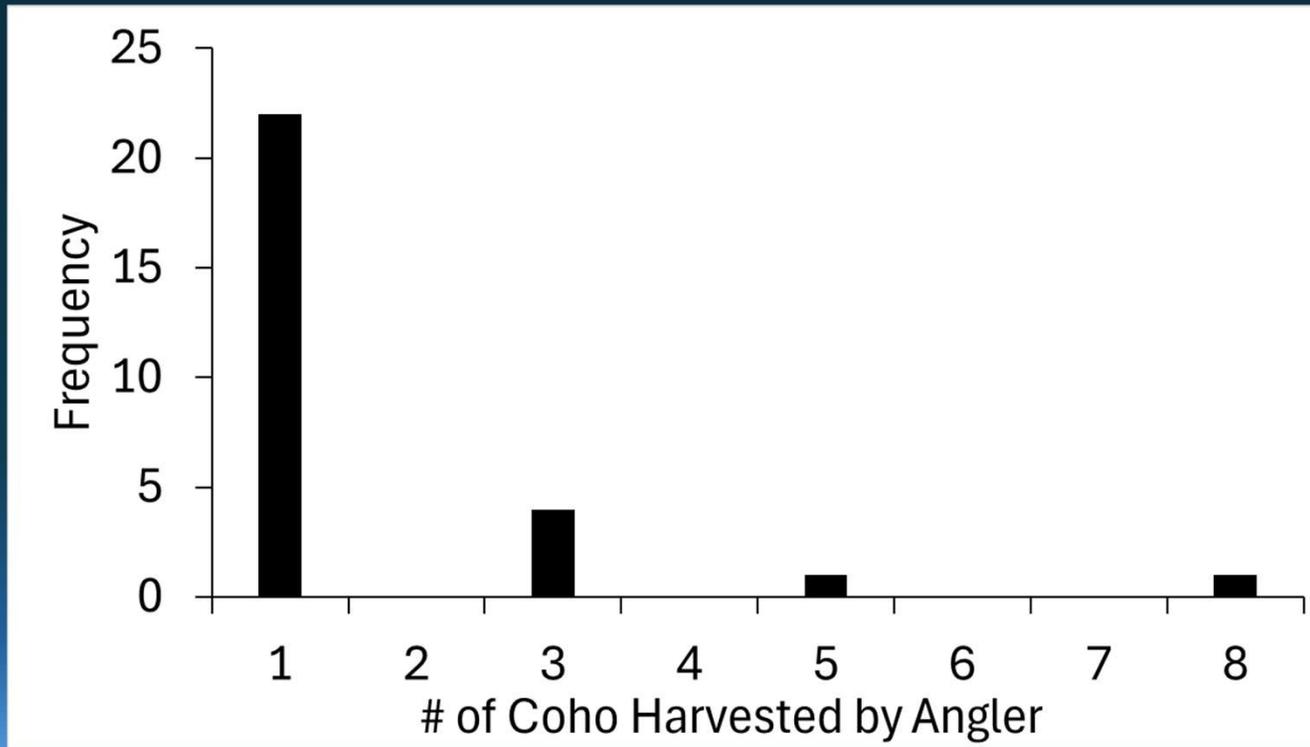

- 366 anglers harvested 683 Chinook
- 96% harvested less than 5 adults
- 2 anglers kept a season limit (10 fish)

Number of fish harvested per angler - Steelhead

- 533 anglers harvested 874 Steelhead
- 98% harvested less than 5 adults
- 1 Angler kept 10 steelhead, all in April in the Upper Salmon R

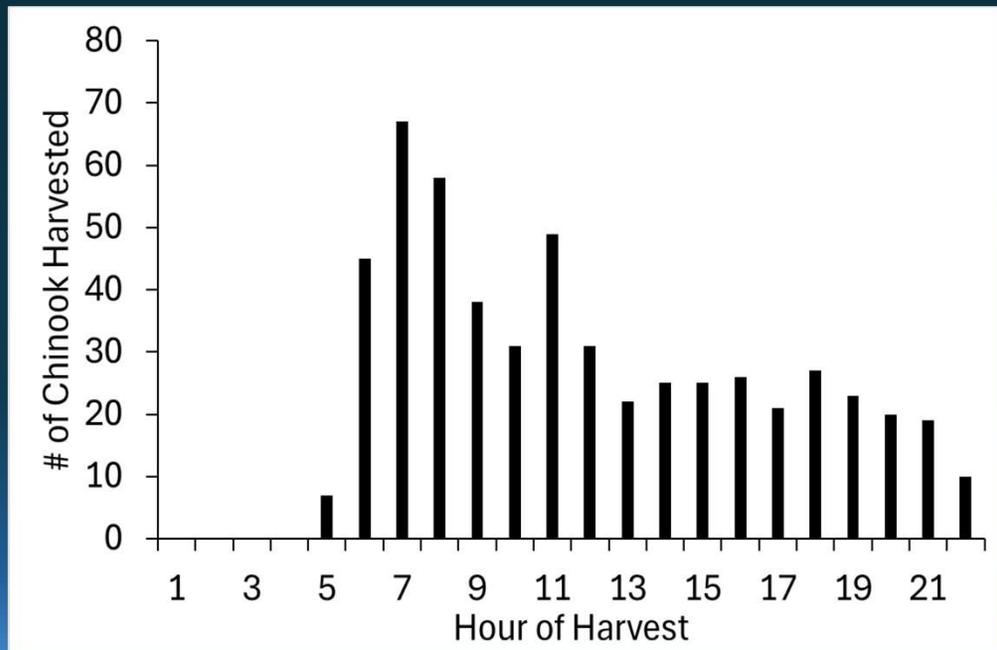

Number of fish harvested per angler - Coho

- 28 anglers harvested 47 Coho
- 1 angler with 8 Coho, all caught before 8:00am

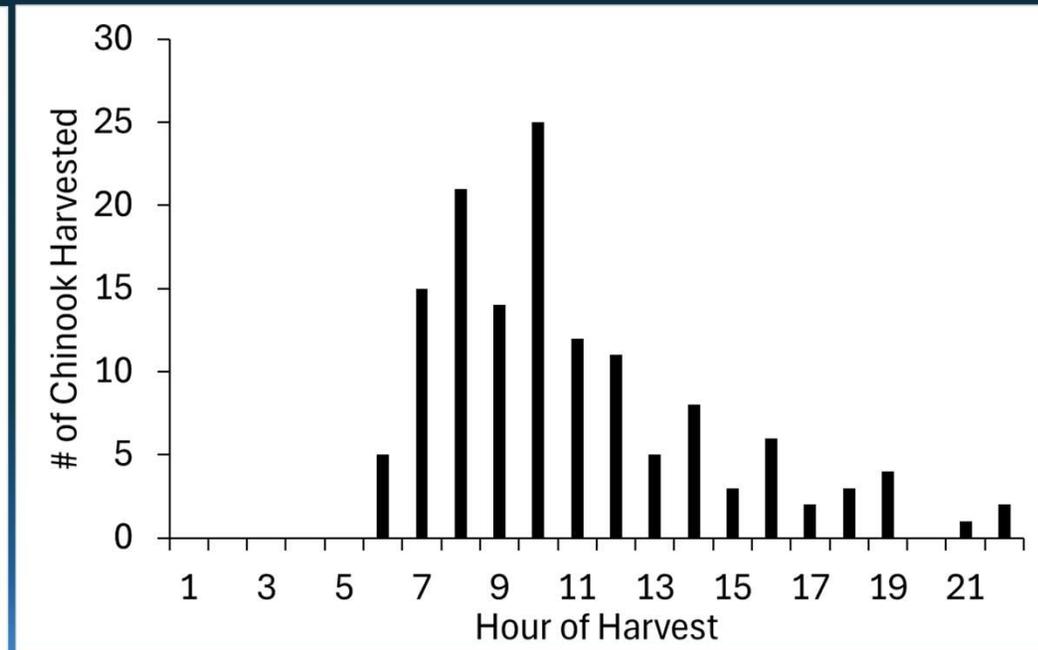

Time when fish are harvested - Chinook

Spring/Summer

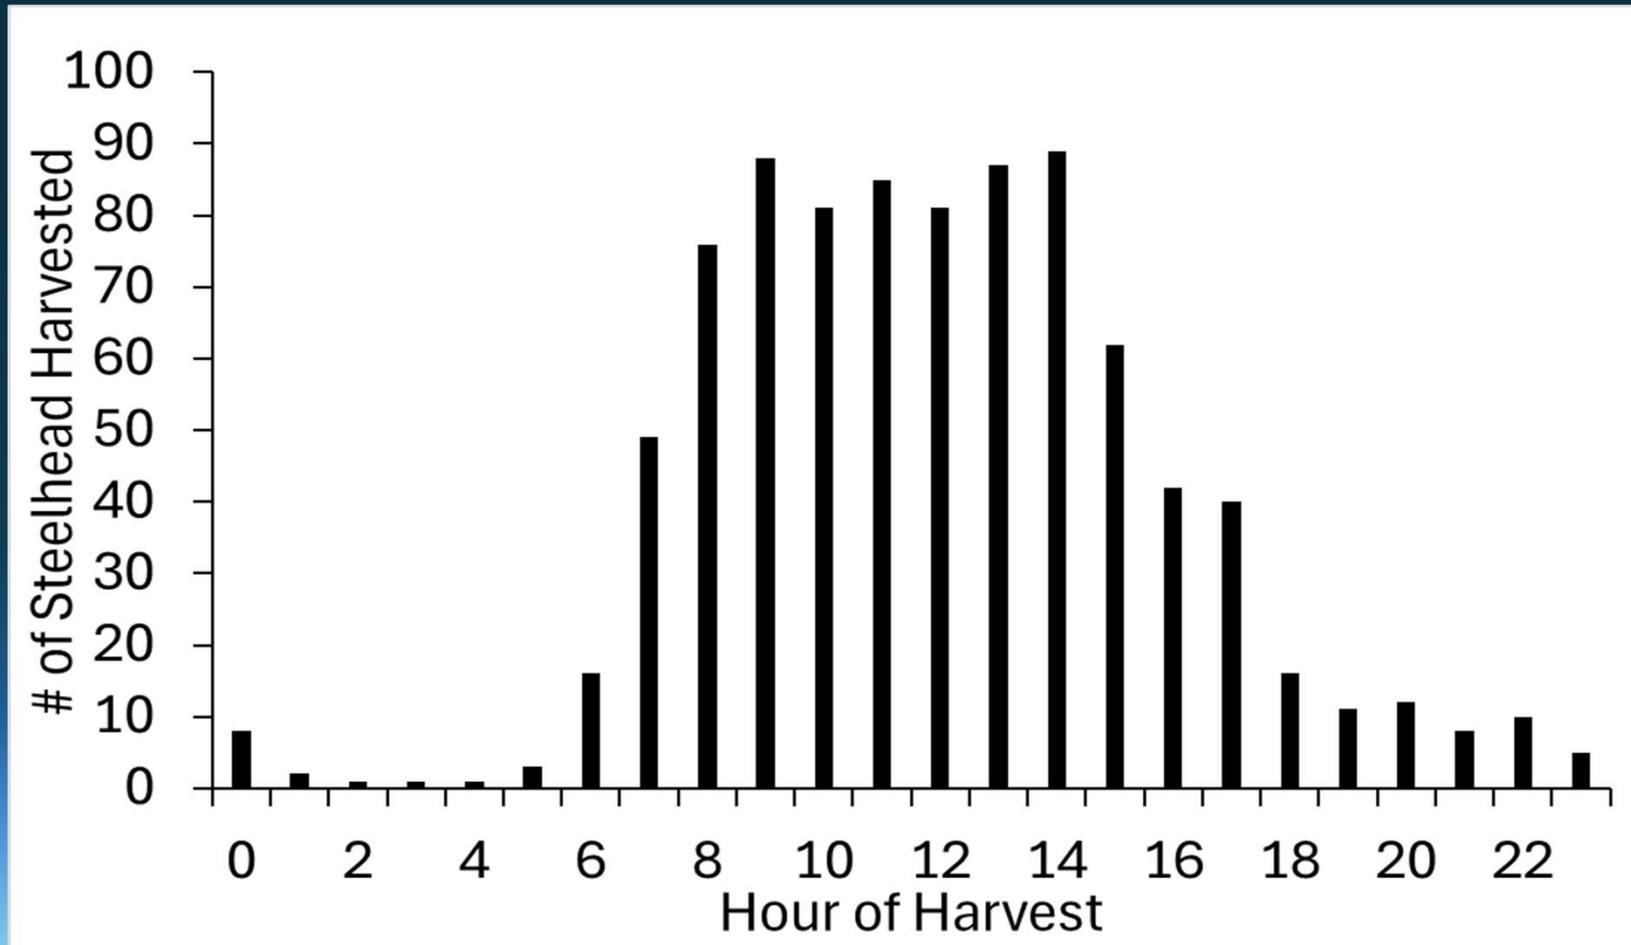

60% of harvest occurred before noon

Fall

75% of harvest occurred before noon

Time when fish are harvested - Steelhead

Challenges

- Remote locations
- Jack-only fisheries
- Anglers not entering correct information
- Low e-tag participation fisheries

Looking to the future

- Continue to make enhancements on the App
- Continue outreach efforts with the public to increase participation
- Incorporate delayed reporting into in-season e-creel model
