Research using Remote Sensing via Aerial Systems to Survey Marine Coastal Pelagic Species RFP Questions & Answers 11/15/2022

- *How many historical survey non-nadir RGB images are in the catalog?*
 - There are thousands (over 5 gigabytes of aerial survey images) of non-nadir RGB images and CDFW will work with the applicant to identify test images from a variety of seasons and locations. Images are stored on external hard drives and internal CDFW servers.
 - CDFW does not intend for the contractor to analyze all images, but rather to use them to test the analysis process.
- *What format are the historical survey non-nadir RGB images in?*
 - Historical survey non-nadir RGB images are in jpeg format
- *What format is the meta data and observer estimates in?*
 - Meta data and observer estimates are in Microsoft excel tables.
